About the University

The Mason Vision

Our Motto

Freedom and Learning

Mission

A public, comprehensive, research university established by the Commonwealth of Virginia in the National Capital Region, we are an innovative and inclusive academic community committed to creating a more just, free, and prosperous world.

Our Values

Our students come first

Our top priority is to provide students with a transformational learning experience that helps them grow as individuals, scholars and professionals

Diversity is our strength

We include and embrace a multitude of people and ideas in everything we do and respect differences

Innovation is our tradition

We strive to find new and better ways to deliver on our mission while honoring time-tested academic values

We honor freedom of thought and expression

We protect the freedom of all members of our community to seek truth and express their views

We are careful stewards

We manage the economic and natural resources entrusted to us responsibly and sustainably

We act with integrity

We hold ourselves to the highest ethical standards as educators, scholars, students and professionals

We thrive together

We nurture a positive and collaborative community that contributes to the well-being and success of every member

The Mason Graduate is...

An engaged citizen:

- ethically oriented and committed to democratic ideals
- respectful of individual differences, rights and liberties
- knowledgeable of important issues affecting the world
- focused on the well-being of others, today and tomorrow
- committed to building a just society

A well-rounded scholar:

- thinks critically and creatively and demonstrates professional competence
- possesses an inquisitive nature
- appreciates science, humanities and the arts
- skilled as a communicator
- committed to lifelong learning

Prepared to act:

- innovative, resourceful and entrepreneurial; ready to do or create a job
- interested and practiced in working with individuals from other cultures, backgrounds and perspectives
- equipped to make positive and meaningful changes in society

George Mason, the Man

George Mason was the central genius of the American Revolution. He was the primary author of both the Virginia Declaration of Rights and Virginia's first Constitution, written in May and June of 1776, which served as examples for other states. He was highly regarded by contemporaries for his intellect and abilities. Thomas Jefferson described him as "a man of first order wisdom," and James Madison described him as "the soundest and clearest reasoner I have ever listened to."

Always a reluctant public servant, he has been referred to as the "forgotten" or "unknown" founder. Most content at Gunston Hall, his home in Fairfax County, he participated in politics only out of a sense of duty. Unconcerned with fame or his reputation in history, he preferred the happiness of "a private station" to "the vexations of public business."

In 1787, Mason attended the Constitutional Convention at Philadelphia. James Madison, although known as the "Father of the Constitution," attributed much of the final document to Mason. Mason refused, however, to sign the Constitution, as it did not guarantee the rights of the people. By his principled opposition, Mason ultimately assured the adoption of the federal Bill of Rights based on his Virginia Declaration of Rights.

As demonstrated in the language set forth in Mason's own documents, no other founder was more acutely aware of the moral depravity of slavery and the contradiction it created. He proposed an elimination of the slave trade as a first step toward eventual emancipation. The institution of slavery was so ingrained in a pre-industrial agricultural society that it was only ended by the American Civil War.

If patriotism is defined as selfless devotion to a country conceived in liberty, then George Mason is our purest Patriot. On April 12, 1996, a seven-foot statue of him presenting his handwritten draft of the Virginia Declaration of Rights was dedicated at the university. A replica of this statue has also been erected at the Mason Korea campus. This statue serves as a constant reminder of the ideals of freedom and learning most important to Mason the man and the university that bear his name.

University History

The idea for George Mason University was born in 1949 when the Northern Virginia University Center, essentially an adult-education extension of the University of Virginia at Charlottesville, opened under

the direction of John Norville Gibson Finley. In 1955 and again in 1956, the Board of Visitors of the University of Virginia and Virginia legislature authorized the establishment of a two-year branch college to serve Northern Virginia.

The university's formal history began in 1957 as University College, the Northern Virginia branch of the University of Virginia, offering courses in engineering and the liberal arts. It opened in a renovated elementary school in the Bailey's Crossroads area with an enrollment of 17 students.

Eager to support the fledgling institution, the Town (now City) of Fairfax purchased 150 acres in 1958 and donated the land to the University of Virginia for a permanent branch campus. The following year, the University of Virginia Board of Visitors selected the name George Mason College. Construction of the campus' first four buildings was completed in 1964. In September of that year, 356 students began their studies in the new classrooms.

In March 1966, the General Assembly authorized the expansion of George Mason College into a four-year, degree-granting institution and gave it the long-range mandate to expand into a major regional university. The first senior class received degrees in June 1968. Graduate programs began in September 1970, with the first master's degrees conferred in June 1971. The George Mason College Board of Control, supported by citizens of the cities of Alexandria and Falls Church, and Arlington and Fairfax counties, acquired an additional 422 acres. By the end of 1970, the college's Fairfax Campus reached 572 acres; it is now 677 acres.

In 1972, the Board of Visitors of the University of Virginia recommended that the college separate from its parent institution. On April 7 of that year, the governor signed the General Assembly legislation that established George Mason University as an independent member of Virginia's system of colleges and universities.

Since 1972, the university's development has been marked by rapid growth and innovative planning. In 40 years, enrollment has risen from 4,166 to more than 38,000 students. In 1979, Mason was given the authority to grant doctoral degrees and began offering programs at this level. In the same year, the university acquired what became George Mason University School of Law, located on the Mason Square campus, and now known as the Antonin Scalia Law School.

In 1985, Mason partnered with area businesses to develop an engineering program geared toward the emerging information technology field and started what is now the Volgenau School of Engineering. With the Volgenau School, Mason was the first institution in the country to offer a doctoral degree in information technology.

The establishment in 1990 of the Institute of the Arts, which became the College of Visual and Performing Arts in 2001, solidified the university's commitment to make the arts an integral part of students' lives. The Center for the Arts and the arts complex, which includes art galleries, studio and rehearsal space, and performing venues such as Harris Theatre and TheaterSpace, are all components of the college.

On the Fairfax Campus, the innovative George W. Johnson Center was dedicated in April 1996. By combining student life resources with educational support facilities such as an interactive library, Mason created the learning workspace of the future. Educational administrators from around the world have toured the center.

The university's facilities continue to grow. In 2006, the university opened its first facility dedicated to research, Research Hall, which contains an observatory and laboratories for a number of campus research centers.

In 2009, the university opened the Long and Kimmy Nguyen Engineering Building, the university's first LEED-certified building on the Fairfax Campus. Also opening in 2009 was the Art and Design Building, which is now home to the School of Art.

Masonvale, a townhome community on campus that provides short-term housing for faculty and staff, opened in late 2009. The Hylton Performing Arts Center on the Science and Technology Campus, celebrated its grand opening in May 2010 and the Institute for Advanced Biomedical Research opened in 2015. The George Mason University-Arlington at Mason Square (*formerly Arlington Campus, name change pending SCHEV approval*), Founders Hall opened in 2011. In 2016, the Point of View International Retreat and Conference Center in Lorton, Virginia, was opened, in 2017, the Potomac Science Center opened in Woodbridge, Virginia and in 2018, the Peterson Family Health Sciences Hall opened on the Fairfax campus. Mason's newest building, Horizon Hall, opened in 2021. This six-floor, 218,000-square-foot building is the largest academic building and centerpiece of the Core Campus Project (<https://construction.gmu.edu/core-campus-project/>) that is transforming the center of the Fairfax Campus with a new and expanded Wilkins Plaza (including the memorial to the enslaved people of George Mason), a renovated Harris Theatre, new green space, and an upgrade to the university's utility infrastructure.

In February 2016, Mason entered the "Highest Research Activity" tier of the Carnegie Classification of Institutions of Higher Education, joining an elite group of 115 research universities.

The university's growing reputation as an innovative educational leader is rooted in Virginia's strong educational tradition. By emphasizing research and study in fields relevant to government and area economic centers, Mason has created a curriculum and mission to meet the needs of Northern Virginia's extraordinary cosmopolitan constituency. The university has also achieved national distinction in many areas. Its reputation continues to grow as Mason provides educational, cultural, and economic resources for the people of Virginia, the nation, and the world.

Faculty and Students

The university's more than 1,400 full-time instructional and research faculty members are experts in a broad range of fields. They have published widely, contributed to major research findings, and consulted with government and business officials. Drawing prominent scholars from all fields, Mason's outstanding faculty have received grants and awards from the Guggenheim Foundation, the Templeton Foundation, the National Science Foundation, the National Endowment for the Arts, and the National Endowment for the Humanities; they have won numerous awards such as Fulbright Scholar grants, Pulitzer Prizes, Mellon Fellowships, Institute of Electrical and Electronics Engineers Centennial Medals, and Nobel Prizes. More than 47 endowed chairs at the university have also brought many internationally renowned artists and scholars to campus.

Of particular interest to undergraduates are the Robinson Professors, outstanding scholars in the liberal arts and sciences who have come to Mason from prestigious positions elsewhere. They are concerned with broad and fundamental intellectual issues and are dedicated to undergraduate teaching and working with Honors College students. In 1984, the first Robinson Professors joined the faculty as the result of a generous bequest from the estate of Clarence J. Robinson.

The majority of the university's more than 38,000 students are from Virginia; however, all 50 states and Washington, D.C., as well as 130 countries, are represented in the student body. While full-time

undergraduates make up the largest student group, part-time graduate and undergraduate students account for nearly half of the student population. Mason welcomes qualified students with a wide range of interests and backgrounds.

Accreditation

George Mason University is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award bachelor's, master's, and doctoral degrees. Questions about the accreditation of George Mason University may be directed in writing to the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, GA 30033-4097, by calling (404) 679-4500, or by using information available on the SACSCOC website (<http://www.sacscoc.org>).

Individual programs or units may also be accredited by discipline-specific agencies. Additional information may be found on the accreditation page of the Provost's website (<https://provost.gmu.edu/administration/academic-affairs/accreditation/>).

George Mason University Foundation, Inc. Mission

The George Mason University Foundation was established in 1966 to receive, manage, invest, and administer private gifts for the benefit of the University, including endowment and real property.

Campuses and Instructional Sites

Mason is a distributed university, with regional campuses in Fairfax, Arlington, and Prince William counties, an international branch campus in Songdo, South Korea, and instructional sites in Loudoun County, Herndon, Lorton, Woodbridge, and Front Royal. Each Mason campus has a distinctive academic focus that plays a critical role in the economy of its surrounding region. At each campus, students and faculty have access to all the university's resources, while the duplication of programs and support services is minimized through the use of technology.

Fairfax Campus

Situated on 677 acres of wooded land, the Fairfax Campus offers a wealth of opportunities beyond the numerous academic programs and is the principal center for undergraduate residence and life. The resident student population of 6,023 is expected to grow to more than 7,000 during the next few years as new residential units are constructed.

The George W. Johnson Center, the first building of its kind in the country, fosters university-wide learning by integrating students' curricular and extracurricular activities and strengthening relationships among university communities.

The Center for the Arts and the EagleBank Arena (formerly the Patriot Center) offer numerous opportunities to experience the arts, as well as sports and other entertainment. Professional artistic events presented

on campus include music and dance from around the world and regional, national, and international visual art exhibitions. Free tickets are available to these events for full-time Mason students.

The Aquatic and Fitness Center provides state-of-the-art exercise equipment and competitive and recreational swimming to the university community and outside teams. The 120,000 square foot Recreation and Athletic Complex (formerly the PE Building) boasts three gymnasiums, two racquetball courts, two squash courts, and a two-story fitness gallery. Additional equipment and exercise space is also available in Skyline Fitness, adjacent to the residence halls.

Mason Square (pending final SCHEV approval - formerly Arlington Campus)

George Mason University-Mason Square, formerly the Arlington Campus, established in 1979, is located near Washington, D.C., on 5.2 acres of land. Mason's most urban location, the Mason Square campus is situated conveniently in the Virginia Square neighborhood and offers easy access via Metro and key transportation routes.

The campus has a strong focus on professional and graduate education and is home to the Antonin Scalia Law School, the Schar School of Policy and Government (formerly SPGIA) and the Jimmy and Rosalynn Carter School for Peace and Conflict Resolution. Mason Square is also home to graduate programs in nonprofit management and arts management. In addition, the School of Business now offers its Executive MBA, Accounting, MS and Real Estate Development, MS programs in Arlington. Continuing and Professional Education is redefining the way we offer executive and professional education. In addition to these executive, graduate and professional programs, some undergraduate courses are also available in Arlington.

Mason Square is home to the Mercatus Center and the Institute for Humane Studies, independent initiatives affiliated with the university. The Law and Economics Center (LAW), Center for World Religions, Diplomacy, and Conflict Resolution (CARTER), Center for Regional Analysis (SCHAR) and the Interdisciplinary Center for Economic Science (CHSS) are some of the many research centers located at Mason Square.

The campus includes four buildings: Hazel Hall, Van Metre Hall (formerly Founders Hall), and Vernon Smith Hall. Van Metre Hall, which opened on the campus in 2011, provides 256,000 square feet of space for academic and student support services. In addition, the building features a 300-seat auditorium, a public plaza, and a large multipurpose room. These additional spaces enable the university to highlight and showcase much of the exciting work taking place at the Arlington Campus - as well as throughout the university - through the hosting of conferences, meetings and other events. During the next five years the campus will undergo a \$250 million transformation. With it will be the creation of the Rosslyn-Ballston Innovation Corridor, an innovation district that will be the first of its kind in Virginia.

Science and Technology Campus

The Science and Technology Campus (SciTech), established in 1997, is the nucleus of the largest research business park in Northern Virginia, Innovation Park. The 134 acres campus in Manassas is surrounded by advanced technology companies and agencies. The campus serves all of Northern Virginia and offers convenient access to the university for citizens of Prince William, Fauquier, and western Fairfax counties; the cities of Manassas and Manassas Park; and adjoining areas to the west and south. A major focus of the campus is research and academic programs in the life sciences, including biodefense and

infectious diseases, cancer proteomics, genomics, medical education and bioinformatics. Graduate studies in Advanced Biomedical Sciences are offered for students preparing for medical school or careers in health professions. Programs in teacher education, information technology, bioengineering, kinesiology, computer game design, mechanical engineering, and athletic training also are offered on the campus.

Campus resources available to all university students, faculty, and staff include a full-service library, large drop-in computer lab, information center, University Police, Student Health Services, dining services, student lounge, shuttle bus service between the Fairfax and SciTech Campuses, and full complement of student and academic services. In addition, there are numerous opportunities to get involved in campus life through a variety of co-curricular and extracurricular activities.

Many campus facilities and services are available to serve university and community needs. The 300-seat Verizon Auditorium located in Colgan Hall boasts innovative audiovisual technologies suitable for presentations, meetings, and ceremonies, along with lobby space for receptions and displays. The campus is also home to the Virginia Serious Game Institute, located in the Katherine G. Johnson Hall, where students and faculty can pursue true multidisciplinary translational applied-research in Simulation, Modeling, and Game Design and Development. A partnership on the SciTech Campus between Mason and the Uniformed Services University allows, Army, Air Force, Marine, and Navy service members to remain on active duty during two years of preparatory coursework for application to medical school. GeorgeSquared, a partnership between Mason and Georgetown University offers a nine-month pre-health preparatory, graduate-level program designed to help qualify students for medical, dental, or other health professional schools.

The campus comprises eight buildings: three research facilities, two academic buildings, a student housing facility, a recreation and fitness center and a performing arts center. Graduate student housing with ground level retail space opened in fall 2012. Through mutually beneficial partnerships with local government and area businesses, the campus has positioned itself to tap into the unique assets of the surrounding community while providing access to university resources and programs for students and citizens. The university's Biomedical Research Laboratory (BRL) opened in 2010. This regional biocontainment facility, the largest of only 12 facilities of its kind in the nation, was partially funded in part by the National Institute of Allergy and Infectious Diseases and houses research on emerging infectious diseases and those caused by biological threat agents.

The 110,000-square-foot Freedom Aquatic & Fitness Center™ offers state-of-the-art exercise equipment, group fitness programs, a full gymnasium with elevated track, and recreational and instructional swimming in a 50-meter competition pool, classrooms, and other meeting spaces. It is also home to EDGE, Mason Center for Team and Organizational Learning's Challenge Course. The SMART Laboratory, located in the Freedom Center is a 2,000 square foot facility that serves as the primary research facility for faculty and students in the Athletic Training and Sports Medicine degree programs.

Prince William County, the City of Manassas, and Mason have joined to create the region's first state-of-the-art performing arts center. The Hylton Performing Arts Center, opened in 2010, provides outstanding professional performances by artists from around the world in world-class venues. With resources for community arts groups; regional business, civic, and service organizations; county and city school students and teachers; Mason students and faculty, The Hylton

Performing Arts Center educates, entertains, and enriches the community.

The Governor's School @ Innovation Park began conducting dual-enrollment classes in physics, chemistry, biology, and engineering (STEM) for high school guest matriculates at the SciTech Campus in 2010.

George Mason University Korea

GMU Korea was established in 2014 as part of the Incheon Global Campus, aiming to become the best global education hub in Northeast Asia. George Mason University was invited by the Incheon Free Economic Zone Authority to come to Songdo and participate in an innovative initiative to educate the next generation of global leaders. GMU Korea now offers U.S. degrees in five undergraduate disciplines. Approved by the Korean Ministry of Education, the degree programs offered afford students the unique opportunity to spend three years at GMU Korea in Songdo and one year in the U.S. at Mason in Fairfax, Virginia. When these students graduate, they receive the same degree as all students from George Mason University.

Instructional Sites

Mason in Loudoun, conveniently located directly on Route 7 in Sterling, Virginia, connects students and businesses in one of the nation's fastest-growing areas to one of the Commonwealth's premier universities. Mason in Loudoun offers undergraduate and graduate level coursework in nursing, health science, education, information technology, leadership studies and management. Professional and executive education programs are also held at this site, as well as classes through the Osher Lifelong Learning Institute. Co-located with Northern Virginia Community College in leased space adjacent to their Loudoun Campus, Mason in Loudoun offers students the same privileges and access as those on Mason's Fairfax, Arlington, and SciTech Campuses.

Smithsonian Mason School of Conservation (<https://smconservation.gmu.edu/>) was established as a partnership between the Smithsonian Institution and George Mason University to provide experiential education for current and future generations of global conservation professionals, leaders, and practitioners. Located in Front Royal, Virginia, the campus offers undergraduate, graduate and certificate programs for students and professionals.

Potomac Science Center is located on Belmont Bay in Woodbridge, Virginia near the mouth of the Occoquan River. The Center is a 50,000 square foot research facility that houses laboratories for teaching and research, lecture rooms, event space and outdoor trails. The LEED Silver Certified waterfront building is home to the College of Science's Potomac Environmental Research and Education Center, and the College of Engineering and Computing Water Based Engineering Research Programs. The Potomac Science Center also supports educational outreach to local schools and opportunities for collaboration with government agencies and private industry.
